

ISO 20022 Compliance

Introduction

ISO 20022 is the international standard for financial messaging. QuantPayChain fully implements this standard to ensure seamless integration with traditional financial systems and regulatory compliance.

Key Benefits

1. Standardized messaging format
2. Enhanced data quality and consistency
3. Improved interoperability with banks and financial institutions
4. Regulatory compliance across jurisdictions
5. Support for complex financial transactions

Implementation

Our platform supports all major ISO 20022 message types including:

- Payment initiation and clearing
- Securities settlement
- Trade services and reporting
- Account management
